THE UK'S DEDICATED TOTAL PARK HOMES REFURBISHMENT SPECIALISTS

t: 0800 222 9722 • e: info@pphs.co.uk • w: pphs.co.uk

“We are absolutely thrilled with Platinum! The installers never stopped and their attention to detail is great.”

- Mr & Mrs Powell

“We came to Platinum in the summer asking them to insulate our Park Home as it got very cold in the winter, too hot in the summer and our energy bills were very high. Platinum have completely refurbished the outside of our home to a professional standard.”

- Mr Walker

OUR APPROACH IS SIMPLE

We don't believe in sales gimmicks, our approach is simple: *fast quotations and surveys, consistently competitive pricing and quality products and workmanship.*

It's easy to see why 1000's of park homeowners have chosen to work with us, our friendly team is always just a phone call away - 0800 222 9722.

We cover...

- ✓ Bathrooms & Wetrooms
- ✓ Full Park Home Refurbishments
- ✓ External Wall Insulation
- ✓ Windows & Doors
- ✓ Roofline Works

- Fantastic customer feedback
- No obligation quotation
- Extensive choice of beautiful bathrooms
- Dedicated project manager throughout

“We are extremely happy with the finish and we would highly recommend Platinum to anyone wanting to improve their home.”
- Mr Paul Miller

PARK HOME WALL INSULATION

WRAP YOUR PARK HOME IN PREMIUM QUALITY EXTERNAL WALL INSULATION

Our park home wall insulation system nearly doubles the thickness of most park home walls, adding a protective layer which not only prolongs the life of your park home, but keeps you warm in winter and cool in summer. Insulation has been proven to reduce energy bills by up to 50%, in addition it enhances the look and value of your park home.

No need to repaint for 10 years

Helps eliminate damp and condensation

Save up to 50% on energy bills

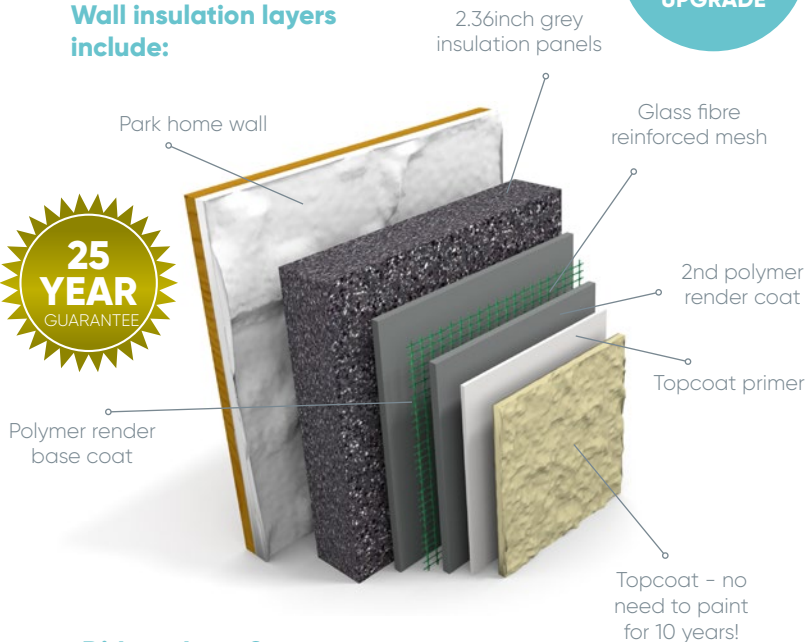

Smoother finish

Reduces noise intrusion

Here is a break down of our insulation to show you the protective layers which prolong your park home. life.

Wall insulation layers include:

Did you know?

White insulation boards are 21% less effective than grey boards. At Platinum we do not believe in cutting corners we only use the highest quality materials.

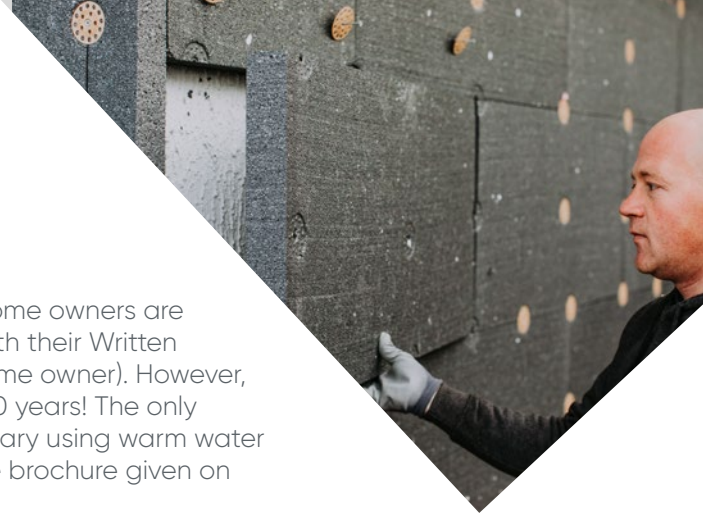

THE HIDDEN BENEFITS OF EXTERNAL WALL INSULATION

No need to repaint park home walls for 10 years – Often park home owners are required to repaint their home every 2-3 years in accordance with their Written Statement (the agreement between the site owner and park home owner). However, a major boon is that the topcoat does not require painting for 10 years! The only maintenance that is required is to gently clean it if/when necessary using warm water and gentle detergent. Which is all explained in the maintenance brochure given on completion of your External Wall Insulation.

Reduces noise intrusion into a park home – As park homes are sometimes sited in close proximity to each other, they can be susceptible to noise intrusion from other homes and passing cars. As External Wall Insulation nearly doubles the thickness of park home walls, noise intrusion is reduced.

Enhances the value of a park home – External Wall Insulation improves the visual appearance of your property adding to its resale value. Better insulation will also improve your home's Energy Performance Certificate (EPC) rating which is an influencing factor when selling a property.

Helps eliminate damp and condensation – When the outside walls of a park home are much colder than the walls inside, it can cause water in the air to be condensed into liquid, creating condensation. Steps to reduce this include well heated and ventilated rooms and the addition of External Wall Insulation. Insulation means the cold walls which were causing a lot of the problem, will not be cold anymore. The insulation will protect the walls and keep them warm, meaning the difference between the temperature of the inside and the outside won't be as extreme.

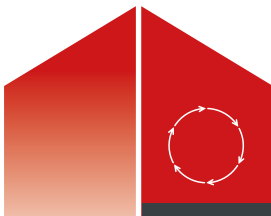

UNDERFLOOR WORKS

UNDERFLOOR INSULATION

Say goodbye to draughts and cold feet from your park home floor. With our years of experience and expertise, our fully qualified installers take great care in fitting premium quality underfloor insulation on parks across the UK.

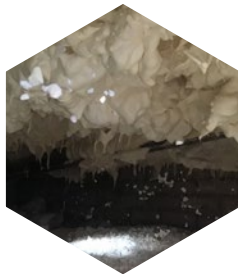

Before

Without insulation cold air penetrates your park home floor making your feet cold.

After

With our insulation the cold air is repelled and warm air is kept inside, helping keep your feet warm.

Did you know?

Sprayed insulation can cause damage to your chassis and leaves the utilities underneath your park home inaccessible. We never spray on cheap insulation, we use quality, accessible insulation panels.

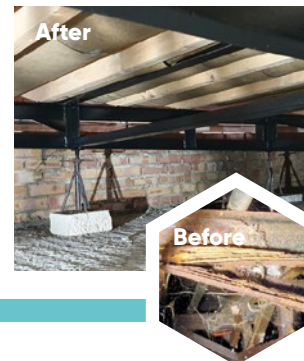

CHASSIS CLEAN & PAINT

Prolongs the life of your chassis with our zinc oxide long-lasting application

We assess the supporting axle stands and advise on replacements where necessary

The chassis of your park home is the only part of your home that can't be replaced, and therefore, essential to regularly maintain it.

Our installers will thoroughly clean the chassis, removing any rust and check for any wear and tear. They then apply a high quality zinc oxide paint and ensure the chassis is left well maintained, level and stable.

AGE UK REVEALS THE DIFFICULTIES FACED BY PARK HOME RESIDENTS

In an Age UK survey of over 200 park home residents aged 65+, over half reported they faced problems staying warm in their home over the winter months, and a similar proportion said their health problems were made worse by cold weather.

Some Park Homes are often poorly insulated. This has left many people vulnerable to low temperatures, and exposure to the cold leaves people susceptible to viruses and illnesses that could potentially be fatal. Similarly, in summer months, park homes can become overly warm and this can lead to heat stress which can affect underlying health conditions. As many park homes do not have access to the mains gas grid, park home residents have to rely on more expensive fuels like LPG (Liquid Petroleum Gas), oil and electricity to heat their homes.

It's common for park site owners to already have a supply agreement in place which restricts home owners ability to shop around for a better deal. This leads to many residents struggling to afford the cost to heat their park home and the health consequences can be very serious.

Modifying your park home using the measures listed to the right, will help to keep your park home more energy efficient; resulting in being warmer in winter and cooler in summer.

DID YOU KNOW PARK HOME WINDOWS HAVE TO BE ODDLEG? NOT HAVING THE CORRECT PRODUCT CAN CAUSE LEAKY WINDOWS AND DRAUGHTS

TESTIMONIALS

“

We were really happy to go with Platinum as we knew several other people had been very happy with their work. We are now looking forward to the winter in the knowledge this will be a cosy home.”

- Mr & Mrs Stevens

“

Both my neighbour and I had Platinum insulate our Park Homes. They are a hard-working, honest company and I would recommend highly.” - Mr Warwick

“

Platinum have made a fantastic difference on our home. A beautiful finish. They were all very hard working and listened to our every need.” - Mr & Mrs Killburn

“

It has been a pleasure to have our External Wall Insulation completed by Platinum. Friendly staff within the workplace make all the difference. We have already recommended you to numerous neighbours and I'm sure you will gain even more work in the future from us.”
-Mr & Mrs Cotter

TESTIMONIALS

“

The office staff were really helpful and professional. The finished product is everything I could have hoped for!”

- Mrs Windmill

“

We are very pleased with the External Wall Insulation from start to finish. All the lads worked exceptionally hard, we love it, it's totally transformed our home and we felt the benefits immediately.”

- Mr & Mrs Buckley

“

We are thrilled with the work Platinum have done to our Park Home, it looks like a completely different home! Even better that we don't need to paint it for 10 years.”

- Mrs Measham

“

Completed exceptionally well and communication with the office was brilliant! A very good job well done by all.”

- Mrs Krubally
